

V101 (Wafer) / V102 (Lug) Series Proval Soft Seat Butterfly Valves

Butterfly valves, since their invention in 1960's became one of the most demanded flow control elements in industrial and domestic flow control applications due to their light weight, low pressure loss, 100% leak free operation, easy and economic automation capabilities.

Beside the soft seat applications, development of PTFE seats and metal seats of double eccentric high performance valves today, butterfly valves are used from basic water applications to industrial applications and highly corrosive severe service applications.

Butterfly valves have wide range of applications in water, sea water, steel, food, paper, chemical, petrochemical and all HVAC and general industrial flow process controls.

Superiorities of New Design Proval V101 Butterfly Valves

- Flow indication marked, ISO standard valve rotating shaft
- Easy removable, anti blow-out plate
- Tag plate with all valve material and usage data including valve serial number
- Long neck for easy insulation
- PTFE / Bronzee bushing provides low torque and longer seat life by centering the disc and avoids leakage from stem due to non-centric rotation
- Integral o-ring system on seat avoid the leakage from stem
- 2 Pc shaft construction disc provides higher flow rates (kv) and lower pressure loss in pipeline
- Special groove on body provides less torque figures in operation and improves the life cycle of seat
- O-ring to ensure 100% leak free operation
- Easy removable lower cap provides easy dismantling of the valve to replace any defected parts on maintenance
- According to ISO 5211 direct mount ISO pad
- Upper stem bushing
- EN1092 PN10, PN16 ANSI 125/150 and BS10 Table-D, Table-E suitable flange holes
- Wide range of seat solutions for all industrial applications
- 4 flange locating holes for easy alignment of valve during installation
- PTFE / Bronzee bushing provides low torque and longer seat life by centering the disc and avoids leakage from stem due to non-centric rotation
- Heat No for easy tracing and QC

V101 (Wafer) / V102 (Lug) Series DN25-600 Butterfly Valves Material List

General Design and Manufacturing Standards

Design Standard	EN 558 Series 20 (DIN3202-K1)
	ISO5752 Series 20
	API609 Table 1
Flange Drilling	BS5155 Series 4
	EN1092 PN 6/10/16
Mounting Flange	ANSI B 16.5 Class 150
	ISO5211
Testing Standard	EN12266-1/2
	ISO5208, Category 3
	API 598 Table 5
	ANSI B16-104, Class VI
Pressure Rating	Max 16 bar
Differential Pressure	Δp 16 bar
Vacuum	Max 0.2 bar absolute pressure

Pressure - Temperature Diagram

V101 / V102 / V103 Series Butterfly Valves Flow Coefficient Kv Values

Kv values given in the table below, show the volume of water in m³/h at room temperature that will pass through a given valve opening with a pressure drop of Δp 1 bar.

Butterfly Valves offer flow characteristics close to linear at angles of opening between 30° and 90°.

Recommended maximum velocity of flow for Butterfly Valves is 1.5 m/s.

DN	Disc Angle-Openness (%)

V101 Series Wafer Type DN25-300 Butterfly Valves

- Available in sizes from DN25 to DN300.
- Tongue and groove design, field-replaceable resilient rubber seats for a wide variety of applications and media.
- Bi-directional bubble tight shut off at full rated pressure of 16 bar(g).
- Flange locating holes drilled to meet PN10/16, ANSI Class 150 and other world drilling standards.
